The EngageIP Software Solution

Automate. Optimize. Simplify.

EngageIP is a robust billing, rating, provisioning and customer management software solution for IP-based Service Providers.

Specializing in IP-based data and telephony services, EngageIP is tightly integrated with M6 and BroadWorks platforms.

Whether your organization is a seasoned BroadSoft provider or a legacy M6 client, EngageIP provides a powerful solution for today...and a proven migration path for the future.

VoIP Telephony Simplified

→ BroadWorks/M6 Provisioning

→ Powerful Import Tools

→ Eliminate Revenue Leakage

→ Modular Architecture

“ LogiSense, with their tightly defined provisioning integration with the BroadSoft M6 product, offered the best platform in the marketplace in terms of functionality, robustness and cost.

Their professional management of the deployment and responsiveness were key attributes in getting the EngageIP solution operational in record time.

They intimately understand the challenges of managing Telephony back office functionality and have incorporated features and tools which demonstrably improve our efficiencies and more importantly our bottom line. ”

Sarah Hughes, Senior Director of
Product Marketing, GENBAND

“ At GENBAND, we’ve worked hard to create a great ecosystem for our partners to add clear and substantial value to our mutual customers.

We recognize the need for a strong suite of billing and OSS capability and we’re pleased that LogiSense has provided a strong solution that increases the value of our product to Epik. ”

Customers using **BROADSOFT** Innovation calling.

The EngageIP platform is being used to service catalogue, rate, bill and provision customized VoIP services and end users with synchronization and revenue assurance capability. These features are tightly integrated with the BroadSoft M6 platform and also provide for real time reporting.

“EngageIP VoIP Billing and OSS was designed with flexibility in order to accommodate the intricacies and challenges of operating a profitable VoIP telephony service,” says Flavio Gomes President of LogiSense.

The LogiSense Migration Path

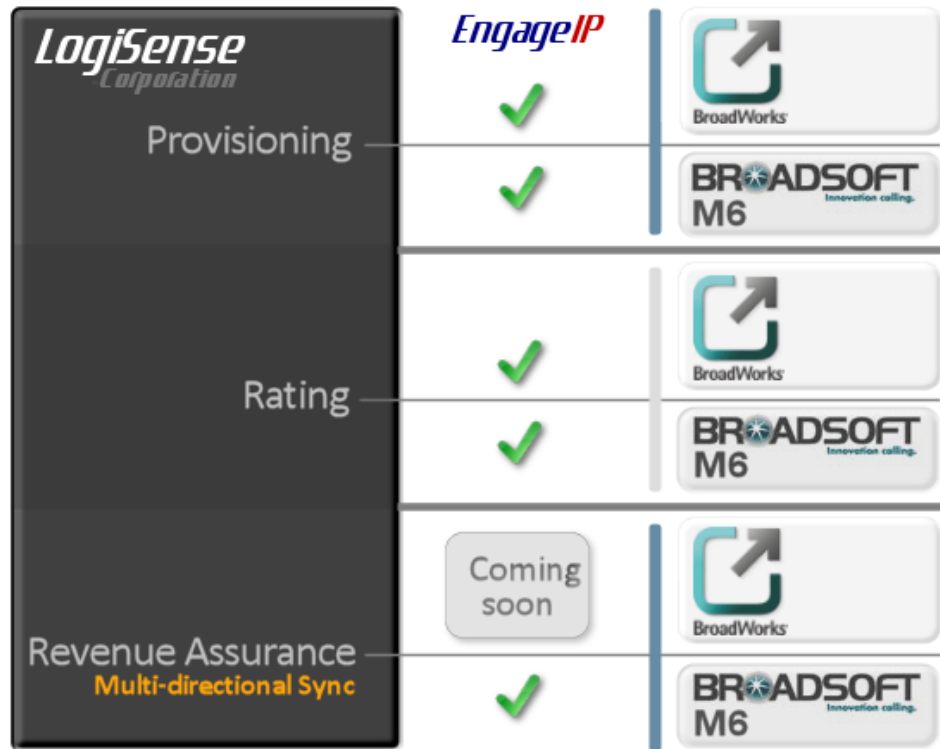

Whether you're an existing BroadSoft BroadWorks or BroadSoft M6 customer, the EngageIP software platform will support your operations for today and accommodate your migration strategy for tomorrow.

By using the flexible EngageIP platform, your organization can reduce costs by running ONE software platform to manage multiple switches.

When the time comes for migration, LogiSense is able to assist and provide support through the entire process.

Switching to EngageIP means that your organization will reduce:

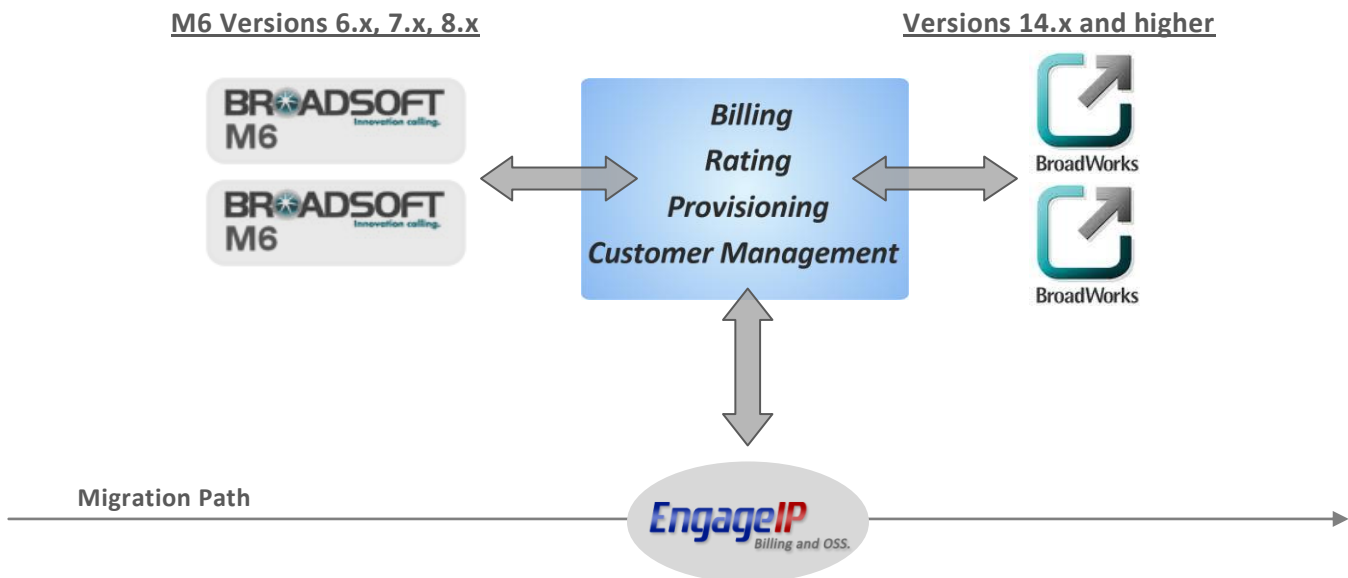

- ✔ Labour Costs
- ✔ Integration Costs
- ✔ Staff Training
- ✔ Licensing Fees

Multi-Switch/Multi-Version Migration

EngageIP can support organizations operating within a multi-switch environment. Our leading edge software can rate, bill, invoice and provision to BroadSoft M6 AND BroadWorks within the same organizational unit.

LogiSense has proven expertise to assist with migrations that are scheduled for rapid cutover or a phased-in approach.
