

Wholesale Billing with **EngageIP 8** Billing and OSS.

LogiSense

As the Telecom markets continue to grow in complexity, so does the need for powerful and flexible Billing/OSS software platforms.

In order to compete in the marketplace, Service Providers are required to frequently change models to accommodate companies reselling services and sharing revenue.

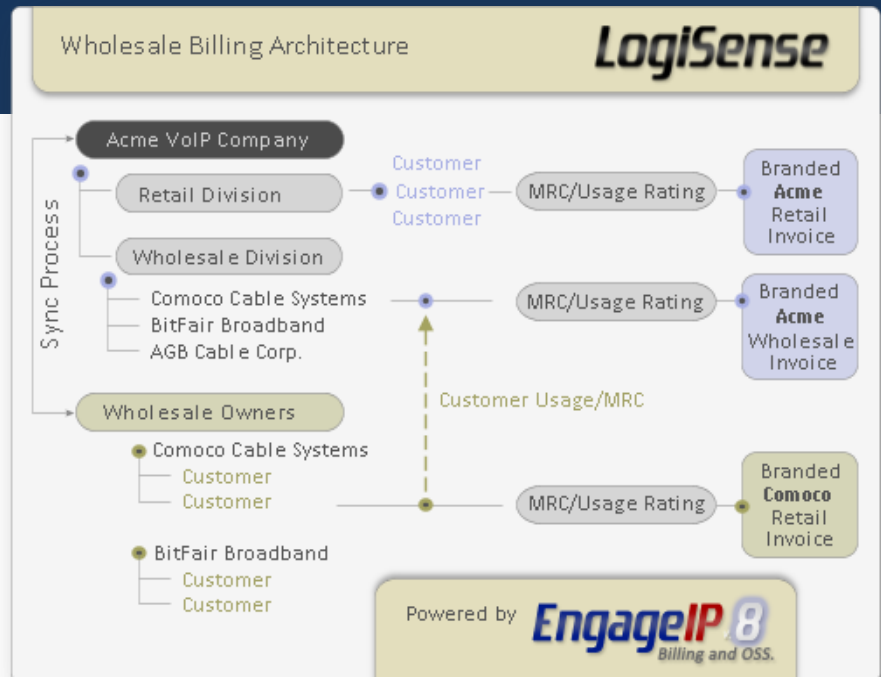

Wholesale Billing with EngageIP is a powerful software solution for IP Service Providers seeking to leverage infrastructure with reseller markets.

FACT SHEET

- **Support for multi-tier rating rules**
- **Automatically calculate shared revenues**
- **Flexible billing architecture**
- **Carrier-grade rating engine**
- **Managed Reseller Billing services**

LogiSense's EngageIP software allows Service Providers to support complex activities such as multi-tier rating. Additionally it enables a rapid roll out of B2B revenue sharing agreements that support usage and non-usage based services.

Multi-party settlement can be supported where a single CDR/UDR record can be used for revenue settlement with any number of partners.

Managed Billing Services

The wholesale ecosystem is predicted to grow for the next several years. The flexibility of EngageIP allows for billing of hosted services and additionally can manage the entire billing/invoicing for all services offered by the wholesale provider. This creates additional sources of revenue for the Service Provider.

It's a cost-effective Billing/OSS software solution that permits future growth and rapid turn up time.

Low Cost of Ownership and Increased Productivity

The advanced EngageIP rating engine allows Service Providers to deploy additional rating engines running on low-cost hardware to achieve a readily scalable rating solution.

Import of Reseller CDR/UDRs can be easily loaded and instantly processed where data can be imported, tracked and controlled through a common set of validation components.
